

TABLE OF CONTENTS

	Page
1.0 INTRODUCTION	1
2.0 CAPACITOR APPLICATION GUIDELINES	3
2.1 Capacitor Application Considerations	5
2.1.1 Capacitor Derating.....	7
2.1.2 Corona and Partial Discharges.....	11
2.1.3 Voltage Breakdown	11
2.1.4 Radiation Damage.....	12
2.1.5 Dielectric Absorption.....	13
2.1.6 Frequency Considerations	15
2.1.7 Equivalent Series Resistance (ESR).....	15
2.2 Additional Notes on Specific Capacitor Types.....	16
3.0 CAPACITOR RELIABILITY	21
3.1 Empirical Failure Rate Data.....	21
3.2 Capacitor Reliability Prediction Models	30
3.2.1 MIL-HDBK-217F Notice 2 Capacitor Model.....	31
3.2.2 Commercial Quality Capacitor Failure Rate Model.....	38
4.0 PARAMETER CHANGE CHARACTERISTICS.....	41
4.1 Overview of WCCA	41
4.2 Parameter Change Characteristics.....	42
4.2.1 Description of Data Presented.....	43
4.2.2 Calculating Confidence Bounds Around The Parameter Change Estimate.....	46
4.2.3 Summary of Parametric Change Data.....	47
4.2.4 Example Calculation.....	52
5.0 CAPACITOR FAILURE MODES.....	55
5.1 Data Collection.....	55
5.2 Data Definitions.....	56
5.2.1 Part Description	56
5.2.2 Failure Mode/Mechanism	57
5.2.3 Normalized Distribution.....	57
5.2.4 Failure Distribution.....	58
5.2.5 Data Sources.....	59
5.2.6 Failure Mode Details.....	59
5.3 Data Summary Example	59
5.4 Capacitor Failure Mode Data.....	61
6.0 DATA SOURCE DESCRIPTIONS	69
6.1 Failure Rate and Failure Mode Data Sources	69
6.2 Capacitor Change Data Sources.....	75
7.0 GIDEP ALERT.....	77
8.0 REFERENCES.....	83
Appendix A: Parametric Change Data Tables.....	A-1
Appendix B: MIL-HDBK-217F Notice 2 Failure Rate Model Development .	B-1
Appendix C: Discussion of Gamma and Neutron Radiation Effects.....	C-1
Appendix D: Worst Case Circuit Analysis Background	D-1

LIST OF FIGURES

	Page
Figure 2.1-1: Capacitor Equivalent Circuit	15
Figure 3.2-1: MIL-HDBK-217F Notice 2 Capacitor Failure Rate Model	32
Figure 5.3-1: Fixed Capacitor Failure Distribution	60
Figure B-1: Model Development Methodology	B-6
Figure B-2: Effect of Circuit Impedance on Failure Rate	B-20
Figure D-1: Excerpt From MIL-STD-198E	D-9
Figure D-2: Excerpt From MIL-STD-198E	D-11
Figure D-3: Excerpt From MIL-STD-198E	D-12
Figure D-4: Excerpt From MIL-STD-198E	D-13

LIST OF TABLES

Table 2.0-1: Generic Part Application Factors	4
Table 2.1-1: Capacitor Selection Criteria	5
Table 2.1-2: Reliability Improvement Potential at Reducing Temperatures ..	8
Table 2.1-3: Part Derating Level Determination	9
Table 2.1-4: Example DoD Capacitor Derating Guidelines	10
Table 2.2-1: Paper and Plastic (Organic) Capacitor Reliability and Application Characteristics	17
Table 2.2-2: Ceramic Capacitor Reliability and Application Characteristics ..	17
Table 2.2-3: Mica and Glass Capacitor Reliability and Application Characteristics	18
Table 2.2-4: Tantalum Foil Capacitor Reliability and Application Characteristics	18
Table 2.2-5: Solid Tantalum Capacitor Reliability and Application Characteristics	19
Table 2.2-6: Wet Slug Tantalum Capacitor Reliability and Application Characteristics	19
Table 2.2-7: Aluminum Electrolytic Capacitor Reliability and Application Characteristics	20
Table 2.2-8: Variable Capacitor Reliability and Application Characteristics ..	20
Table 3.1-1: Data Field Descriptions	22
Table 3.1-2: Application Environments	23
Table 3.1-3: Capacitor Failure Rate Data	26
Table 3.2-1: Uses For Reliability Predictions	31
Table 3.2-2: Series Resistance Factor - π_{SR}	39
Table 3.2-3: Capacitor Constants	40
Table 4.2-1: Regression Models Presented	44
Table 4.2-2: Activation Energies	45
Table 4.2-3: Capacitor Specific Constant	46
Table 4.2-4: Parameter Change Factors	47
Table 4.2-5: Confidence Bound Constants	47
Table 4.2-6: Average Parameter Values for Calculation of ΔC vs. Time	48
Table 4.2-7: Average Parameter Values for Calculation of DF vs. Time	49
Table 4.2-8: Average Parameter Values for Calculation of ESR vs. Time	49

LIST OF TABLES

	Page
Table 4.2-9: Confidence Level Multiplier.....	52
Table 5.2-1: Example of Combining Data.....	58
Table 5.2-2: Failure Distribution Results.....	58
Table 5.4-1: Capacitor Failure Mode Distribution Data.....	62
Table 6.2-1: Summary of Capacitor Drift Data Sources.....	75
Table 7.0-1: Ceramic Capacitor Alerts.....	77
Table 7.0-2: Tantalum Electrolytic Capacitor Alerts.....	78
Table 7.0-3: Aluminum Electrolytic Capacitor Alerts.....	80
Table 7.0-4: Plastic Capacitor Alerts.....	81
Table 7.0-5: Mica Capacitor Alerts.....	81
Table 7.0-6: Variable Capacitor Alerts.....	81
Table 7.0-7: Teflon Capacitor Alerts.....	81
Table A-1: Detailed Regression Results of ΔC vs. Time.....	A-3
Table A-2: Detailed Regression Results of ESR vs. Time.....	A-10
Table A-3: Detailed Regression Results of DF vs. Time.....	A-12
Table A-4: Detailed Regression Results of ΔC vs. Temperature.....	A-17
Table A-5: Detailed Regression Results of ESR vs. Temperature.....	A-22
Table A-6: Detailed Regression Results of DF vs. Temperature.....	A-23
Table A-7: Detailed Regression Results of ΔC vs. Voltage.....	A-25
Table A-8: Summary Regression Results for ΔC vs. Time.....	A-26
Table A-9: Summary Regression Results for ESR vs. Time.....	A-27
Table A-10: Summary Regression Results for DF vs. Time.....	A-28
Table A-11: Summary Regression Results of ΔC vs. Temperature.....	A-29
Table A-12: Summary Regression Results of ESR vs. Temperature.....	A-31
Table A-13: Summary Regression Results for DF vs. Temperature.....	A-32
Table A-14: Summary Regression Results for ΔC vs. Voltage.....	A-33
Table B-1: Pros/Cons of Each Model Type.....	B-4
Table B-2: Capacitor Quality Factor.....	B-9
Table B-3: Temperature Acceleration Factors.....	B-10
Table B-4: Capacitor Activation Energies.....	B-11
Table B-5: Environment Operating Temperatures.....	B-12
Table B-6: Observed Environment Factors.....	B-14
Table B-7: Dielectric Factor.....	B-15
Table B-8: Base Failure Rate.....	B-15
Table B-9: Solid Tantalum Capacitor Life Data.....	B-16
Table B-10: Values of n for Various Capacitor Types.....	B-17
Table B-11: Proposed n Values.....	B-18
Table C-1: Radiation-Induced Capacitor Parameter Changes.....	C-3
Table C-2: Changes in Capacitance and DF Due to Neutron Irradiation.....	C-5
Table C-3: Neutron Flux for Permanent Damage.....	C-5
Table D-1: Part Types vs. Principle Sources of Variation.....	D-4
Table D-2: Capacitor Source of Variation vs. Parameter Affected.....	D-4
Table D-3: Determination of Min and Max Values.....	D-6
Table D-4: Example Capacitor Data Sheet.....	D-14
