

## Table of Contents

	Page
Preface .....	v
1.0 INTRODUCTION .....	1
1.1 What are MEMS? .....	2
1.2 Functionality .....	4
1.3 History of Classic MEMS Devices .....	4
1.3.1 Pressure Sensors .....	4
1.3.2 Accelerometers .....	5
1.3.3 Inkjet Nozzles .....	7
1.3.4 Hard Drive Read/Write Heads .....	7
2.0 STATE-OF-THE-ART MEMS .....	9
2.1 Micromirrors .....	9
2.2 Motors .....	10
2.3 Imaging Systems .....	11
2.4 Power Technologies .....	12
2.4.1 Fuel Cell .....	12
2.4.2 Microturbine .....	13
2.4.3 Solid State Combustible Power Generator .....	14
2.4.4 Other Power Technologies .....	14
2.5 Telecommunications .....	14
2.5.1 Optical Network Switch .....	15
2.5.2 Other Optical Components .....	17
2.5.3 RF Components .....	17
2.6 Biotechnology .....	18
2.6.1 Microarrays .....	19
2.6.2 Biotech Microfluidic Devices .....	21
2.6.2.1 Valves .....	22
2.6.2.2 Micropumps .....	24
2.6.2.3 Micromixers .....	24
2.6.3 Other Biotech Devices .....	26
2.7 Inkjet Microfluidic Devices .....	27
3.0 FUTURE APPLICATIONS .....	29
3.1 Future Combat Systems .....	29
3.2 Biotechnology .....	31
3.3 Other Applications .....	31
4.0 NANOTECHNOLOGY .....	33
5.0 MEMS MATERIALS .....	35
5.1 Materials Characterization .....	36
5.2 Standards .....	37
6.0 TYPES OF MANUFACTURING PROCESSES .....	39
6.1 Background in IC Fabrication .....	39
6.2 Basic MEMS Fabrication .....	40
6.3 Advanced Etching Techniques .....	43

## Table of Contents (Cont'd)

		Page
6.4	Deposition Processes .....	44
6.5	Wafer Bonding.....	45
6.6	Laser Micromachining.....	46
6.6.1	Excimer Lasers.....	47
6.6.2	Diode-Pumped Solid-State Laser.....	48
6.7	Other Manufacturing.....	48
6.7.1	LIGA .....	49
6.7.2	SUMMiT™.....	50
6.7.3	EFAB™.....	51
7.0	MANUFACTURING PROCESS ISSUES.....	53
7.1	Stiction.....	55
7.2	Particulate Contamination and Fabrication Defects .....	57
8.0	COMPUTER-AIDED DESIGN, MODELING, AND ANALYSIS.....	59
8.1	Modular MEMS Models.....	59
8.2	MEMSCAP CAD Solutions .....	59
8.3	IntelliSuite MEMS CAD .....	60
8.4	CoventorWare MEMS .....	60
9.0	RELIABILITY ISSUES .....	63
9.1	Data Collection .....	63
9.2	Failure Modes .....	64
9.3	Performance Characterization.....	65
9.4	Packaging.....	67
9.5	Vibration .....	69
9.6	Design for Manufacturability (DFM) .....	69
10.0	COLLABORATIONS, CONSORTIA, AND ALLIANCES.....	73
10.1	Defense Advanced Research Projects Agency (DARPA).....	73
10.2	MEMS Exchange .....	73
10.3	Institute for Defense Analyses (IDA) .....	74
10.4	MEMS Industry Group .....	74
10.5	The American Society of Mechanical Engineers (ASME).....	74
10.6	The International Society of Electronic and Electrical Engineers (IEEE).....	74
10.7	(Former) Corning IntelliSense .....	74
10.8	IntelliSense Software Corporation.....	75
10.9	The Reed Electronics Group.....	75
10.10	The Reed Business Information Science and Medical Group .....	75
10.11	Semiconductor Equipment and Materials International (SEMI) .....	75
10.12	MEMSTAND.....	75
10.13	Micro and Nanotechnology Commercialization Education Foundation (MANCEF) .....	76
10.14	MEMUNITY .....	76

**Table of Contents (Cont'd)**

	Page
Appendix A: Bibliography.....	77
Appendix B: Terms and Definitions.....	83
Appendix C: Failure Data.....	87
Index .....	91

## List of Figures

	Page
Figure 1.0-1. The Electronic Numerical Integrator and Computer (ENIAC) .....	1
Figure 1.1-1. A Micromirror Assembly With a Mite Standing on the Gear Drives.....	3
Figure 1.1-2. A Dust Particle on Top of TI's DMD Micromirror Device .....	3
Figure 1.3-1. An Implantable Sensor that Measures Blood Pressure and Flow Rate.....	5
Figure 1.3-2. A Classic Mass-Spring System.....	6
Figure 1.3-3. Excimer Drilled 720 dpi Inkjet Printer Nozzle Holes.....	7
Figure 2.1-1. A Two-Mirror Section of TI's Digital Micromirror Device (DMD) .....	9
Figure 2.1-2. Images of the DMD Mirror Array .....	10
Figure 2.2-1. A Linear Rack-and-Drive Motor .....	10
Figure 2.3-1. An Ultrasonic Imaging Sensor.....	11
Figure 2.4-1. Microscale Reformer .....	13
Figure 2.5-1. A Grating Light Valve (GLV) .....	15
Figure 2.5-2. A Schematic of a 2-D Optical Switch.....	16
Figure 2.5-3. An Example of a 3-D Optical Switch .....	16
Figure 2.5-4. Agilent's FBAR Resonator Duplexer (Foreground) .....	18
Figure 2.5-5. A MEMS Oscillator .....	18
Figure 2.6-1. A Simulation of a DNA Microarray .....	20
Figure 2.6-2. A DNA Microarray from Molecular Probes.....	20
Figure 2.6-3. A Microvalve Design with No Moving Parts .....	23
Figure 2.6-4. Passive Valve Designs .....	23
Figure 2.6-5. A Coanda Effect Mixer, Using Modified Tesla Structures .....	25
Figure 2.6-6. A Mixer with Multiple Coanda Cells .....	26
Figure 2.7-1. A Rotary Electrostatic Drive Motor Printed Entirely from the Inkjet Process .....	28
Figure 5.0-1. Examples of Single Crystal Silicon Ingots .....	35
Figure 6.1-1. Positive and Negative Resist Developing Process.....	40
Figure 6.2-1. Subtractive Micromachining Process .....	40
Figure 6.2-2. Additive Micromachining Process.....	41
Figure 6.2-3. Bulk Micromachining: Isotropic Etching .....	42
Figure 6.2-4. Bulk Micromachining: Anisotropic Etching.....	42
Figure 6.2-5. Sketch of a Basic Pressure Sensor Configuration.....	42
Figure 6.3-1. DRIE: Bosch Process.....	44
Figure 6.5-1. A Simple Sketch of the Wafer Bonding Process .....	45
Figure 6.5-2. A Triple-Wafer Bonded Accelerometer .....	46
Figure 6.6-1. Excimer Marked Human Hair.....	47
Figure 6.7-1. A Simple LIGA Process .....	49
Figure 6.7-2. Various Gears Fabricated by LIGA.....	50
Figure 6.7-3. A Mechanical, Binary Combination Lock Made by Sandia's SUMMiT™ Process .....	50
Figure 6.7-4. Microfabrica's EFAB™ Process .....	51
Figure 6.7-5. A Microfluidic Ejector Designed Using Microfabrica's EFAB™ Process....	52

---

**List of Figures (Cont'd)**

	Page
Figure 7.0-1. Test Structures for MEMS Design.....	54
Figure 7.0-2. A Series of Test Structures on a Coventor Process Characterization Die .....	54
Figure 7.1-1. The Drying Process for an Unprotected Cantilever After an Etch Release...	56
Figure 7.1-2. A Cantilever Designed With a Tip to Prevent Stiction During the Drying Process .....	57
