	Page
Foreword	xi
Acknowledgement	xiii
PART I: OVERVIEW	1
1.0 INTRODUCTION	3
1.1 Background	3
1.2 Objective	3
1.3 Best Commercial Practices	4
1.4 Commercial Product	4
PART II: BEST COMMERCIAL PRACTICES	7
2.0 BEST COMMERCIAL PRACTICES	9
2.1 Concurrent Engineering	9
2.1.1 The Need For Concurrent Engineering	10
2.1.2 The Essence of Concurrent Engineering	11
2.1.3 Common Misconceptions Regarding CE	13
2.1.4 Benefits of Concurrent Engineering	13
2.1.5 Management Challenges of Concurrent Engineering	14
2.1.6 The Multi-Discipline Team Concept	15
2.2 Other Best Commercial Practices of World-Class Suppliers	15
2.2.1 Best Commercial Practices (BCP) Principles	16
2.2.2 Summary	27
2.3 References	27
PART III: COMMERCIAL PARTS AND PROCESSES	29
3.0 GENERIC ELEMENTS OF A PARTS PROGRAM	31
3.1 Establishing a Preferred Parts List	34
3.2 Vendor and Device Selection	36
3.2.1 Critical Devices/Technology/Vendors	39
3.2.2 Plastic Encapsulated Microcircuits (PEMs)	41
3.2.3 Hidden Hybrids	41
3.2.4 Device Specifications	42
3.2.5 Screening	43
3.2.6 Part Obsolescence and Diminishing Manufacturer Sources (DMS) ..	43
3.2.7 Failure Reporting, Analysis, and Corrective Action System (FRACAS)	46
3.3 Design for Reliability	46

TABLE OF CONTENTS (CONT'D)

	Page
3.3.1 Reliability Assessment/Lifetime Analysis.....	48
3.3.2 Derating	50
3.3.3 Failure Mode and Effect Analysis (FMEA).....	52
3.3.4 Worst Case Circuit Analysis (WCCA)	52
3.3.5 Fault Tree Analysis (FTA).....	52
3.3.6 Finite Element Analysis (FEA).....	53
3.4 Design for Manufacturability	53
3.4.1 Manufacturing Emulation	53
3.4.2 Electrostatic Discharge	54
3.5 Parts Management Plan Evaluation Criteria.....	55
3.5.1 Quality Improvement Program	55
3.5.2 Quality Assurance.....	56
3.5.3 Assembly Processes.....	61
3.5.4 Design Criteria.....	63
 PART IV: DEVICE RELIABILITY AND QUALITY ANALYSIS AND	
TEST METHODS AND PROCEDURES	
	67
4.0 TOOLS TO EVALUATE PARTS/VENDORS.....	69
4.1 Testing	69
4.1.1 Origins of Testing	69
4.1.2 Testing Evolution.....	71
4.1.3 Screening Philosophy	73
4.1.4 Sample Testing	77
4.1.5 In-Process Testing	77
4.1.6 Life Testing.....	77
4.2 Analysis.....	84
4.2.1 Destructive Physical Analysis (DPA)	84
4.2.2 Continuous Monitoring of Defect Levels.....	85
4.2.3 Data Analysis.....	85
4.3 Plastic Encapsulated Microcircuits	88
4.3.1 Typical Plastic Encapsulated Microcircuit Testing.....	97
4.3.2 Data Analysis and Modeling of Plastic Encapsulated Microcircuits (PEMs)	101

TABLE OF CONTENTS (CONT'D)

	Page
PART V: APPENDICES	121
APPENDIX A: HARDWARE RELIABILITY TEST & DEVELOPMENT	123
A.0 INTRODUCTION	125
A.1 Traditional Hardware Reliability	125
A.1.1 Accelerated Testing	126
A.1.2 MIL-HDBK-781	128
A.2 Contemporary System Test Techniques	130
A.3 Rome Lab DOE Reliability Testing	132
 APPENDIX B: CASE STUDIES	 139

LIST OF TABLES

	Page
Table 2-1: Dissimilar Industry Comparisons for Best-in-Class	18
Table 3-1: Questions for Part Suppliers.....	38
Table 3-2: Hidden Hybrid Checklist.....	42
Table 3-3: Generic Part Application Factors	48
Table 3-4: Uses for Reliability Assessments.....	49
Table 3-5: Pros and Cons of Reliability Assessment Models	50
Table 4-1: Device Defects	70
Table 4-2: Comparison of Best Commercial and Typical Commercial Practices..	72
Table 4-3: Screening/Test Requirements vs. Maturity.....	76
Table 4-4: Factors to be Considered When Deciding Who Will Perform Tests/Screens	 77
Table 4-5: Summary of Characteristic Lives (α) and Shape Parameter (β).....	84
Table 4-6: PEM Failure Modes/Mechanisms (Circa 1970's).....	93
Table 4-7: Average Early Life Failure Rates of PEMs	93
Table 4-8: Screening (JEDEC Standard 26B "Plastic Packages for Use in Rugged Application").....	 100
Table 4-9: Summary of Field Reliability Data.....	101
Table 4-10: HAST Data Analysis Summary.....	102
Table 4-11: Summary of Failure Categories and Associated Failure Sites/Stress	 103
Table 4-12: Summary of Failure Category Distributions as a Function of Data/Test Type.....	 103

LIST OF TABLES (CONT'D)

	Page
Table 4-13: Test Data Used To Tailor Model	106
Table 4-14: Data Used to Determine the Activation Energy	106
Table 4-15: Reliability Growth Rates	108
Table 4-16: π_{HAST} vs. HAST Mean Life and Time	111
Table 4-17: Stresses Used for Example Calculation	114
Table A-1: MIL-HDBK-781 Sequential Reliability Demonstration Test Plan Summary	128
Table A-2: MIL-HDBK-781 Fixed Length Reliability Demonstration Test Plan Summary	129
Table A-3: 1/3 Fractional Replicate	133
Table A-4: RL In-House Test Data.....	135
Table A-5: Data Contrasts	135
Table A-6: ANOVA Result	136
Table A-7: Percent Error of the Model Estimate	137

LIST OF FIGURES

	Page
Figure 2-1: A Comparison of Sequential and Concurrent Engineering.....	11
Figure 2-2: World-Class Electronics Manufacturers.....	16
Figure 2-3: Reliability Task Application by Quality-Focused Companies.....	20
Figure 2-4: Customer Involvement at IBM Rochester	20
Figure 2-5: Predicted vs. Actual Field Failure Rate	22
Figure 2-6: Root Cause Analysis Process	26
Figure 2-7: Defect Status Chart.....	26
Figure 3-1: Parts Management Program	32
Figure 3-2: Vendor Selection Methodologies	37
Figure 3-3: Part Obsolescence and DMS Process Flow.....	45
Figure 3-4: Reduced Screen Flow	60
Figure 4-1: Relationship Between Chip Cost and Improving Reliability.....	72
Figure 4-2: Specification and Handbook Activity.....	73
Figure 4-3: Parts Screening Process.....	74
Figure 4-4: Hypothetical Failure Rate vs. Time.....	75
Figure 4-5: Failure Rate vs. Time and Maturity.....	76
Figure 4-6: Weibull Plot of Test Group 1	82
Figure 4-7: Weibull Plot of Test Group 2	83

LIST OF FIGURES

	Page
Figure 4-8: Weibull Plot of Test Group 3	83
Figure 4-9: Histogram of Bond Pull Data	86
Figure 4-10: Control Chart of Bond Pull Data	87
Figure 4-11: Probability Plot of Bond Pull Data.....	87
Figure 4-12: Hermetic Package	88
Figure 4-13: Plastic Package	89
Figure 4-14: Glob Top Packaging for Chip On Board (COB)	89
Figure 4-15: Hermetic Package Failure Mechanisms	90
